Monsoon deficit in Bengal, Bihar, UP slows down paddy sowing

SANDIP DAS
New Delhi, July 24

In April, 2022, the government had set a record food-grain production target of 328 million tonne (MT) in the 2022-23 crop year (July-June) against 314 MT of production in 2021-22, as per the third advance estimate of foodgrain production released in May. Rice production target of 112 MT in the ongoing kharif season of the 2022-23 crop year (July-June).

benchmark – long period average (LPA). So far, rainfall in July has been 12.5% of LPA.

THE SOUTHWEST MONSOON continues to be active over the south, central and western regions, while parts of Uttar Pradesh, Bihar, West Bengal and Jharkhand are yet to get adequate rainfall this season. There were deficiencies in rainfall in western Uttar Pradesh (49%), eastern Uttar Pradesh (59%), Bihar (44%), West Bengal (47%) and Jharkhand (51%) against the benchmarks till Sunday. This has hit paddy sowing.

The excess rainfall in the southern peninsula (32%), and central India (27%) so far have given a boost to sowing of pulses, oilseeds and coarse cereals.

Last week, the government did not release official data on the progress of paddy sowing citing delay in getting reports from states. Experts say that the paddy sowing window will be over in the next couple days.

In the sowing data last released on July 15, paddy sowing area was reported at 12.8 million hectare (MH) which was 17% less than year ago level. Area under all summer crops including paddy, pulses, oilseeds, coarse cereals, sugarcane and cotton sown area were reported at 59.21 MH, marginally higher than corresponding period last year.

"We are still optimistic that the shortfall in paddy sown areas would be covered soon," an agriculture ministry official told FE.

According to the agriculture ministry, oilseeds such as soyabean, groundnut and sesame had been 5% up from the same period last year till Friday. Soyabean has been sown in 10.83 MH so far which is an increase of more than 9% than previous year. However, groundnut sowing has been close to 8% down compared to previous year.

Pulses have been sown in 6.5% more area than last year. Arhar, which constitutes the higher share in India's import basket, sowing has been lagging behind by 20% so far.

However, sowing of urad and moong has been up by more than 7% and 31% respectively so far. The India Meteorological Department (IMD) on Sunday predicted intense rainfall activity in Gujarat, Rajasthan and Madhya Pradesh in the next two days. The met department also predicted an increase in rainfall activity over northern parts of the country from July 27th onwards.

The cumulative rainfall received during June 1-July 24 was 422 mm, which was 11% more than the normal benchmark of 380 mm for the same period. Central India and the South Peninsula have received 27% and 32% more rainfall respectively than the normal range so far. The rainfall deficiency in northwest India and east and north east regions has been 1% and 15% respectively.

As many as 28 out of the country's 36 meteorological subdivisions recorded rainfall in the range of normal (96-104%), above normal (104-110%) and excess (110% and above) range against the

Trust-based tax system boosting mop-up: FM

FE BUREAU
New Delhi, July 24

THE TRUST-BASED taxation system introduced by the government has led to a rise in mop-up and caused a spike in the number of return filings, finance minister Nirmala Sitharaman said on Sunday.

Direct tax collections jumped 49% in FY22 from a year before to hit a record ₹14.09 trillion, supported by robust collections from the individual and corporation tax segments. The finance ministry has budgeted a marginal year-on-year rise in direct tax collection for FY23 at ₹14.20 trillion, which is all

set to be breached, as the mop-up remains healthy. On the occasion of the 163rd Income Tax Day, the finance minister commended the tax department for achieving the record collection in FY22 and exuded confidence that the momentum would be maintained in the current fiscal as well.
